

Terence Clack Watch User Manual inc Warranty

Brand Introduction

The watch you choose makes a statement about you, it tells your story. The story ours tells is one of time, the importance of time and our mission is to connect people through timepieces. Terence Clack was a father and grandad to the owners and through his hard work and efforts during a career as a postman, factory worker and HGV fitter, gave up his time to create our opportunity to bring these effortless timepieces to you. His passing demonstrated the importance of time, time with loved ones and time focused on achieving goals.

We've made it our mission to bring you affordable quality watches in a series of collections, starting with our Stonebridge collection. We aim to bring a regular selection of limited quantity collections to you focused on locations that were important to Terence and we hope you can find ways to connect with loved ones through gifting or creating your own memories through our timepieces. We hope you like our watches and collections as much as we do and look forward to bringing these designs to you.

Technical Information

1.VD53 Quartz Movement

- 1) Pull out the crown to the first click to amend the date.
- 2) Turn the crown clockwise until the correct day's date appears.
- 3) Pull out the crown to the second click to adjust the time, this will cause the time to stop to allow you to adjust it. Set the hands to the desired time of the day (make sure AM/PM is set correctly) by turning the crown clockwise.

*When the crown is at the second click position. Do not press any button, otherwise the chronograph hands will move.

- 4) Push the crown back into the normal position once you have set the time and / or date
- 5) To use the stopwatch function, click the top button in and hold for 2-3 seconds and the stopwatch [middle dial] will start.
- 6) If you need to stop the stopwatch, hold the top button in again, and repeat as required to stop/start the stopwatch.
- 7) If you wish to reset the stopwatch, hold the bottom button down for 2-3 seconds and the stopwatch will return to the start, please note it will return to 3 seconds prior to 0 to account for start / finish of the stopwatch

2.Waterproof performance

The water resistance of the Stonebridge collection watches is up to 5ATM (50 Metres). That means you can wear our watches while washing hands with cold water or having a walk on a rainy day. That doesn't mean you can wear it while taking bath or swimming (details check the "Precautions" section), this will cause the watch to stop working and will invalidate any warranty. 5ATM relates to water pressure and is not related to water depth.

Precautions

Correct use of the Stonebridge collection will ensure long-term normal operation and precise timing.

Temperature

Do not expose your watch to the environment with drastic changes in temperature (immediately immersed in cold water after in isolation) or extreme temperature (above 60 degree or below 0 degree).

Shock

Avoid thermal shock and other shocks that may damage your watch.

Hazardous products

Avoid direct contact with solvents, detergents, perfumes, cosmetics, etc. Which may damage bracelet, case or washer.

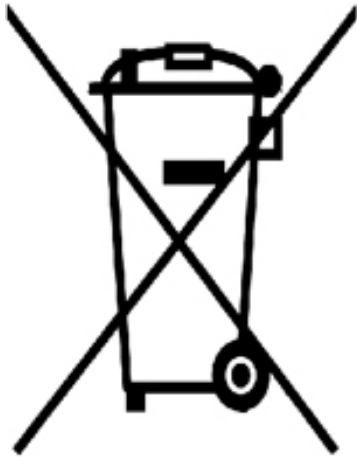

Cleaning

We recommend that your watch be cleaned regularly with a soft cloth to prevent sweat-induced corrosion. All waterproof watches can be cleaned with a toothbrush and clean water and then wipe it dry with a soft cloth.

Warranty

All watches purchased direct from Terence Clack Watches with proof of purchase are eligible for a one year manufacturers warranty. This does not cover negligence or misuse.

Environmental Protection

As the interior of a watch contains recyclable materials or potentially polluting parts, to protect the environment and make contribution to human health, we advocate that you do not throw the product with household wastage but should hand it to the local authorized collection agency, and then you will be a force of protecting the natural resources.
